## The 12 Senses — the basis of spatial perception

After all, our senses are the organs with which we perceive architecture. I would like to show a way to develop more awareness — and also more precise concepts — for sensory perception. What we experience in perception as a complex unit must be differentiated and structured. For the multi-layered areas of sensory perception, we have the most diverse organs of perception that we need to know.

# The reflection of architecture in the physical body of the human being

An approach to consciously experiencing architectural qualities through unbiased observation

#### **Newsletter IFMA-FRANCE — June** 2024

Here are some news about our past events and others to come in France:

### Space - Perception - Consciousness

Report of the conference held at the Alanus University on March 8-10, 2024
