

The 12 Senses - the basis of spatial perception

After all, our senses are the organs with which we perceive architecture. I would like to show a way to develop more awareness – and also more precise concepts – for sensory perception. What we experience in perception as a complex unit must be differentiated and structured. For the multi-layered areas of sensory perception, we have the most diverse organs of perception that we need to know.

Des espaces de développement pour les enfants

Thoughts on Architecture Suitable for Children. At the moment, day-care centres are being built everywhere. When one sees the results, the question often arises: Who was this built for?
